Social infrastructure and necessity of political plan

Kuroda International Foundation

Takeshi Kuroda

Social environment as road and housing, park, college, library, business that those must be constructed under the plans. Due to have all necessity for society and lives.

Ideally, the demands of parcel development are that the state and society have their harmony and order.

As anew construction of all infrastructures bases upon to new technology and systems. That is all possibility to settle himself with society 5.0.

With new information highway with Internet is all communication infrastructure moving forward to new societies.

We have to be in a future that next generation society is all reality and newly asking to build society is needed to be built with above bases.

All these are required to be under political plans. Construction of society are planed and bases under next generation standard.

Must understand that wealth of lives is with social environment. That is an equal requirement for any region of nation.

AS following any change of times are more than any useful to see new life systems. All these understanding are creation of new world and lives.
