

Standardization of military communications and IT systems

Kuroda International

Takeshi Kuroda

Forwarding unify of army within Asia region to standardize systems. These are with all space technology to resettle army forces and environment.

Bases with all agreement as soon as we may try to make new environment. Politics may have new vision and plans to face any reality of the world.

These are full cooperation of Asia to be participate with world anew. Bases same condition to the world.

The we are facing all reality of the world. Russia and China matter are under own decision to handle itself.

As we could offer own vision of the world against Western camp. We are sharing the world not under owned by.

These are the decision that we are not trying to be belongings.

As we could standardize own currency systems under digitalized self.

These are realized under a month long. These are presence of politics we are creating anew.
