The world will collapse under any conflict of realities, but we must seek a new world.

With any reality being reconsidered, we need our world vision to share the future. It may be based on new world systems which are reconsidering our reality.

All new systems and technology cause us to recreate the world under all use of progress in any academic field, which is fully useful for new society and livelihood.

And all new cooperation is not limited to this ground of earth but any related to the universe.

We need to agree entirely on the same vision of the future. Then, we may unify nations under a unified government.

There is the world's recreation, from any habit of ancient times to new possibilities for the future. To see the whole world how many ambitious talented may share the same world and the same future?

We are trying to gather without any difference of races or nationalities, with the same vision and the same future.

Under any circumstances, we hope you only have to know our agreement.

All conflicts contain wars in history. But we are trying to share the same idea and vision this time.

Can we find any agreement and actions in any political field based on all these ideas? So we need to make ourselves with those.

This is the way to recreate and make the world new. We determine ourselves in a new world and future.
