

Starting from the Russian invasion for coming future

KURODA International

Takeshi Kuroda

Hysterical movement by media is mass incitement to ask plans. That is the irony that this is as same as the Orange Revolution in Ukraine.

There that relationship between Russia and NATO never back to it was. A new participant called China has a concern with Taiwan. That what we know is there is an alliance with Russia and China.

In the middle east, there started with new world order from Israel.

NATO must build its justice and fully participate. These are converged to world government.

United Nations only works for that.

This must be all that it is.

All representatives of any nation only follow and work for that.

We have to know that media control is a truth and that we must be more than careful. And united nations are used by tools.

There must be the construction of their world that we have to see with its sys.

There that what I have to ask is there resistance any?

This is moving forward to the future.
