

Suggestions for World Management at the world conference

KURODA International Consulting

Takeshi Kuroda

We are asking for world unification under its management at the world conference.

There are under-gathered representatives of all nations. And all decision of the world is from its agreements.

This new management of the world gives a new world with new realities. Either we are trying to make a new framework. These are the new possibility we are trying to share with further cooperation.

We have a new era that expands to the whole universe with its possibility. If we ask for its purpose to the world, how the reality we could wonder?

I am asking for the same standard in all societies in any region. That must be planned under designing a new world for smart bureaucrats.

We are trying to share the possibility of the future. These are from an entire agreement of the world.

As we face all truth of the world, but on the other hand, how should the world accept all proposals?

How should people accept all these comparisons?

How could we ask for all results as we offer the world revolution?

We use this idea to be compared with the new world order and are trying to ask about the people's decisions.

We may disclose any information and ask for all settlement of the reality.
