

Taiwan matter and any action of the USA

Kuroda International Consulting

Takeshi Kuroda

The United States only uses Taiwan as a tool to make judgments. Politicians participating in these international communities have no choice but to act under these WASP standards.

If the world were to reveal all the truth about Ukraine and Taiwan, what choice would people give the world? They can raise revolutions and they can win.

The brave have only victory, and the timid have only defeat.

If everything can be controlled with money, what kind of judgment will the world give us to hold justice to these realities?

When these two realities bisect the world, which one will win?

If the settlement of all these histories is a battle, how will victory be given?

How do hopes and disappointments divide reality?

All fictions in history have lies. Will the choice of the future be left to people?

Victory and defeat are the only truths of all pasts. can we face against it?

Any choices are under your hand. I mean with all people., We had plenty of heroes in history, Who remain today?

If we had a choice for the future, we need equally step forward.
