

Team Asia

Kuroda International Foundation

Takeshi Kuroda

All society must be rebuilt under society 5.0. And the industry is based on industry 4.0. Politics and its measures cause these.

These are the decision to remove any realities to the next society.

With new space ages, we declare top presence to the world. That is asking for further investment in new infrastructure and development bases.

All human sources have participated in the new reality. These are under their capital and industry to renew any region field.

These are based upon several academic centers with unification and new construction of all realities within regions.

The unification of army forces is under the same standard and communication and data systems as same as NATO system.

New energy is based on all life cycles. Zero environmental stress is promised to the contemporary eras.

Education is promised to all people in the region in free of charge as all environments are of top quality and systems by political agreement.

These are under the same consensus of the region by all representatives of nations.
