

Technology and national power equal to those of the United States

Kuroda International Consulting

Takeshi Kuroda

This is the only permission we could ask for in the future.

If we try to put ourselves into reality, we must be prepared for these necessities.

Rely or the belong gives us only a slaveness. This is an agreement under power politics.

How could we find a world and the future? This is an answer.

We could find that new technology has the possibility to change the world and recreate the world. We have a new space age and a new contact with the universe.

Technology allows us to decide the reality. We have a change of ages to the future.

To face reality, we need all its fundamentals. That gives us only permission to ask for any realities.

Everyone must say that the world is already decided. But if you give a decision to the world, we may find a change.

Power may only stand equally to any reality. If we deeply consider it, it may be a reality we have in the world.

To be prepared for the future, we need at least the same environment and reality. That only permits equal standing points.

We must know this is our only choice to seek a future.
