

Tesla shock

KURODA International

Takeshi Kuroda

Technology and production system create high efficiency. That is a revolutionary change from current to recent.

This company style gives new standard with coming future. Their efficiency and use of new systems are new styles within the '80s that covered the world as Japan as No.1.

Let you try to imagine with a new idea. A new office environment and production with a new system could serve more than all imagination with its efficiency. That new trend requires new approaches and is used by times.

Moral and social responsibility gives a new environment to the business field. They were there asking with all MBA progress that may seek business style anew.

IT systems cover all business that even creates new efficiency and methods of running.

We may consider that difference in efficiency from past to now as the progress of MBA; we are putting us in new realities.

Industry 4.0 as machinery production under IT control may settle new environment. These are fundamental differences from the past system and now style.

These are the Tesla shock that we are facing with its business.
