To serve a high trend of livelihood to all people and to encourage the recreation of society under the measure of society 5.0 and smart city. All these are promised under politics with a controlled economy.

All these are given under national economic security and the growth of domestic industry to make them a reality.

All these are shifts to the future from ancient systems. As we have to know, all these are under any political decision and action.

These requirements form a complete agreement between central and local governments and seek agreement on the full national transformation and the construction of a new society.

All these are shifts to new socialism from liberalism.

And we may forecast that if all these realities are given to China or India, all economies must not be reached by the others.

We have to be sure that all these are only possible under political determination to shift and recreate a nation.

It is possible to seek new judgments and decisions regarding reality, such as withdrawing from the free trade system and cooperating in building its economic zone.

And you may remember what we have insisted. Politics always decide the world.

We could make a detailed plan of all politics and do realize them in a second.

These are leadership requirements since he could make it a reality and a nation.
