

The World War 3 and moving to world government by United Nations

KURODA International

Takeshi Kuroda

This is a plan of tails of the world that we must handle ourselves to all these realities.

There must be justice and all publicities. With admiring the victory of World War 3, any evils must be punished by a justice.

All public opinion manipulation is moving to the future. Media and people may not ask any doubt against it.

That means we do not have any choice in reality. Only those who are permitted may stay forward to the future.

14400 and 600 million who are selected that we will face to the reality tomorrow.

To be compared with the world, we are served the last answers.

That is only an above we can work for in the future. Wise only be a step onto reality but an idiot.

This is only permission we may work above. Genius may own the world.
