

The agreement of lasting society (TAOLS)

November 12nd, 2023

Kuroda International Consulting

The permanent existence of the world and society and the formation of agreements and rules for activities propose the permanence of reality under new social rules.

1. Building a self-sufficient social cycle will establish a new social operation that eliminates all environmental burdens.
2. Politics agrees to provide a livelihood for all people and proposes a future of society's permanence and sublime progress.
3. All industries will realize new self-building based on the agreement of zero emissions.
4. These mandate the creation of recyclable products for all products in the treatment of household garbage and industrial waste, and these, along with a new consensus in society, will realize the construction of a self-cycle.
5. A society that does not rely on the logic of exclusion shares ethical judgments and creates the reality of the future.
6. The restructuring of reality in terms of mutual benefit proposes the creation of a new world.

All these are the new basis of the reconstitution of all realities as we have all new technologies that give us use of themselves. We are trying to construct all new fundamentals of society.

All these could be under political agreement and consensus to create the future. And we need to know all necessity of themselves,
