

The choice of a world that is not based on the suffering of one person

August 31st, 2024

KURODA International Consulting

Takeshi Kuroda

When politics demand that we all share responsibility for each other, we mustn't overlook the pain and suffering of any one person. Our empathy and compassion are essential.

These concerns may create a new reality in the new world.

We may find all social problems and conflicts of reality. However, representatives of all nations may agree upon new rules and laws to establish a new world governance.

We are trying to leave the past, which is filled with tears, but the new future is filled with unlimited possibilities for the future.

As you may find, all these are under all new consensus and decisions of all politics. We may discover new hopes, so we need to realize them all.

All politicians have new responsibilities, and they must create their new worlds with new ideas and visions.

Once we stop looking to the future and try to solve all conflicts and problems, we may see that it will give us all changes to the world.

The world may not be built upon any sacrifice. We are trying to make paradise instead of any pain and suffering.

We are trying to propose new concepts and share the same visions, which may recreate the world from confusion and conflict to its unification and new hopes.

We see politics have their decision which constructs any reality as the future.

We, Kuroda International Consulting, proposed a new world vision with new systems. We have the honor to be in touch with the world regarding the new future that we have proposed.
