

The choice of hope

March 14th, 2024

Kuroda International Consulting

Takeshi Kuroda

We see history continue itself with hope. That is the truth we have reached today with a world.

So we have a choice called hope. And we are asking who is.

Only a direction we have must be hope. That is a choice we could offer.

To see all the realities of the world, we have to hold hope to face them. That causes a way to the future.

A hope could give a world as the future. We have to ask what all people follow themselves.

The hope must reach the future. That is a decision we need.

But hope must face reality. That is a decision we are forced to make.

We also must seek hope in politics. They are only possible to give us the future.

A new world vision must be found hope for all people. That must be a future that we seek.

And finally, I have to ask, do we have hope in the world? But any steps we make must give hope to the world.

We insist on this worldwide; politicians must make them with themselves to give hope to the world.
