create the future

The day the world changed.

Kuroda International Consulting
Takeshi Kuroda

If all justice is a cave where tigers and wolves hide, reality has already ended when they bear their fangs and take over the world.

We have to be prepared for the day to come. This is a new world order that is all confession of Evil.

If any justice is only a lie, what is your decision?

Those who follow justice and the ideal of humanism must face the Anglo-Saxon mission and all purposes of Jewish.

If China dreams his ideal of the world, they have to see the reality of the world.

If we face the day, we may find it is too late to come.

Who has a life and a future? That is the right question you may seek the world.

What the past has? We can find an answer in the future.

The future is only under the choice of people. That is what I said that choice is a world.

We need a truth of the world that is only what we can work for.

We know all reality of the world. That is what we have to know. What is justice?

These are any realities we can find in the world. And how could we reach the future?

As we spend all our effort from our office. We have to see the day to come.
