

The decision facing with Ukraine matter

KURODA International

Takeshi Kuroda

The declaration of denial of invasion presents the world with a self-judgment that hides from the camps of free nations.

This gives agreement with the world and seeks its reality. Any wars that occurred under the globe without its acceptance of. This comes new consensus that the world asks own agreement.

All its past has the glory of victory but with a new world out of any prize.

Under all arguments and agreement must be all bases without wars,

These are forwarding to the unification of the world. These are all declared by whole Asia unifications.

We are not accepting Western Justice but eastern philosophy.

I am trying to expand all these agreements with all nations under the acceptance of all nations' representatives. These are bases we could ask same futures.

The past is filled up with wars but never be with a future. It was then forwarded to United Nations on the whole agreement to the end of all its history.
