Takeshi Kuroda

If the assassination in Iran is the beginning, the world will have the creation of a new world.

The future is not far off, and it holds new realities that will encompass the world. We have a new world vision, a vision that we invite you to discover.

Who must seek the world government? And the whole world must follow all these realities.

The world has a king. He must make his dream come true with a world.

If reality covers the world, we will not have a choice. The whole world must follow them.

Only we could be concerned with how the space entity makes its decisions. We need to know if the Illuminati has contact with and cooperates with space.

All these are related to the world that is trying to resist them.

Our only possibility is to have our world vision against all realities. Please understand we pay all our efforts.

If Armageddon is all reality we find in the future, what should be our decisions?

The only direction we had had in the past was hope. And do we find hope today?

If we can stand against the world in an equal position, this may only permit us to wars.

Above all, we insist on sharing all our ideas with the world.

We need the future, which causes us to step against the world. But who could make them not follow realities? For this, we are proposing to you to make it and to make a new world.
