

KURIDA INTERNATIONAL

The end of history and society in righteous governance will give the answer.

Kuroda International Consulting

Takeshi Kuroda

We equally spend ourselves in history. History seeks an answer. All reality reaches any proof of self.

It gives all truth for its governance. We have a variety of society in the world, and it has their governance.

All these must be known by Matrix as all control. If we have a history of mistakes, there is a who has to take responsibility for them.

These are the clearings of history. All perpetrators and victims must be identified.

Governance must take all responsibility for the people. They may not ask for control.

How is the west idealized? That has an answer.

We find all pain and suffering of all peoples in history. Now we reach the world with new dreams.

Who must take a prize at this last moment of history? It must be a people but a king. It must be an answer that we could equally share of self.

We have needed righteous governance, and we will need them in the future. Under the settlement of reality, we have to ask for all agreement and seek a new world then.

We can not build up the world on all sacrifices of people.

As we sent all proposals from our office that we are trying to solve all problems and seek all solutions to a new world.

We propose all new cooperations and share the new world.
