

The explanation for the Ukraine invasion and forecast for the future

KURODA International Consulting

Takeshi Kuroda

All weakness of the Russian army shows any truth of invasion. We had a cold war and could find a military map. But we are facing the reality of the world.

We find a power balance there, as all industrial securities with the Advanced industry could still seek a future.

As we forward our eyes to NATO, they have a plan for the future called the new world order. How could we make any decisions?

As we will find justice from United Nations. What could we see as his justice? Any decisions of the people are all from any development of CIA agents, as all there are from any media.

Under all these circumstances, how could we plan any actions? We have to be wise then we find ways.

Reality gives us only permission to make any step into the realities. That means we may not dream of a world but only ask for reality.

Only the way we could find is to build the same condition as they are. Asian union could base them and ask for cooperation under its world visions.

Our world vision and their world vision could force all people to its decision.

As we may expect a world revolution. But we could base them and try to make the world under its world visions.

Facing any truth of the world, world revolution could hold itself full of its possibilities.

And we have only an opportunity that we could work for. That gives me to force you to make all decisions.
