Create the future

The final challenge of equality within the world

KURODA International Consulting

Takeshi Kuroda

We are permitted equally stand in the world. This is the only way we can survive.

Under governing by the white race and the roots of the West, we can not find equality to participate in the world. But the only permission we could ask for the future is that we try to judge the world by equality.

We can find an Anglo-Saxon mission. We may rise ideal, and we may seek a new world.

These are the challenge we stand equal to the world.

If we try to build our reality, independence must be the tail of all our reality.

If we fail, reality must cover the world, and we can not make it up as it used to be.

As we are facing world war 3rd. We have all necessities for this challenge.

How could we find the future? It must be based on our actions.

Decisions determine the future. This must be the truth.

As we know any realities of the world, equality is the only permission we can step into the world.

We may imagine that any reality of ours stands equal to the world.

I was not trying to be enslaved as I should gain myself to the world.

What you can find in the world is all that you have done.
