

The future of which is called a choice

December 27th, 2024

KURODA International Consulting LLC

Takeshi Kuroda

King has a decision about the world and the future. And he could design the world.

And what is the attitude we may wonder that must be for all peoples he must promise the world?

Any conflict must be with a new world instead, which means we need a new consensus of the world with a new philosophy.

If the world is for all peoples, we may find all irony today with all the world's reality, and we could propose a new philosophy to recreate the world.

These are the new concerns for the international society and all the politics we may propose.

We find one description in the bible about kings of the sun-rising nation. King is gifted to all peoples, for which we only may find hope and the future.

The choice is any reality promised to be realized in the future. So, we need to be wise to make all things new, and this is from all academic progress that allows us to discover any progress in reality.

May we dream of the future? And these are the results of all politics.

We have the complete honor of consulting the world anew. And we are asking for all new conversations.

We try to describe new world design with any idea of ours to the world. These are our next society of its ideas and visions based on any philosophy and understanding.

King may have a choice to realize any vision and idea from our office to the world.
