To see all past what the victory means? There are all that existed in the past and filled up themselves.

There must be tears of people in the past, as we see in Ukraine and the Gaza Strip. Who has the victory of history?

We need a hero. As Hollywood says, the first hero of this planet is Captain America.

Who decides on it? Not selfishness but the entire decision of all people.

If any history has conflicts and battles, we can say that there have been victories in all its histories.

But we can't ignore all people. They are the ones who must possess the world and its decisions.

If men require victory as food for their sorrows and sufferings, then he who gives it will reap the reward.

The world is the people, and the people are the world. Therefore, victory must come from the hands of the people.

Above all, if the people are given their real king, the world must be solved for all problems. These are the ways to realize a righteous world.

At this time, if the eternal tears of the people can be wiped away, they should make that choice.

This is all the reason we need real politicians. That is who sent the hopes back to us from all history of wars that steal everything from us all.
