

The most profound consideration of the Ukraine Invasion

KURODA International Consulting

Takeshi Kuroda

Africa and Third countries have offered ceasefires, but NATO has not. The military-industrial complex wants war.

The absolute weakness of the Russian army shocked the world. For China, our ally, this should be nothing but fear.

And under all truth, we are trying to recalculate the world. Only we find is the absoluteness of the Western camp.

The military map of the world has completely changed, and third countries are beginning to give their own words to the world.

No one yells justice to the world as we can not find justice in the world.

The Anglo-Saxon mission is world-building in Anglo-Saxon terms. The new economic system and money system always depend on this.

United Nations must ask for his decision, but we can not find them. We see Russia's nuclear and space technologies that may not ask for all steps of NATO.

The world has changed by all new realities, and we find all uncertain of any realities.

And the future must go on. And what could we find in them?

And we see all the highest technology and system of the NATO forces. If world war 3<sup>rd</sup> is already planned, we may not have a decision.

If United Nation agrees with his justice, we may have more than any opportunity to work for. We may disclose all information and build our world government.
