

The new power balance of reality and international public opinion

October 20th, 2023

KURODA International Consulting

Takeshi Kuroda

We find a new reality in the world, and all people must change their minds to all reality from starting all this confusion by Covid 19.

In the Gaza Strip, any reality is with hatred. We must see all the tails and need a solution for a reality.

The future must not be under all this hatred. But under all these realities, we have difficulty dreaming about the future.

But we need to pay all our effort for the world. Power balance is all reality we have in the world. And international public opinion must follow them.

This shows us the whole necessity of the peace. Asian Union must be based this agreement to the world.

And we have to show our world vision to the world. That must be a proper effort for us to work for the world.

But we see power games as a reality we have here in the world. That is what we may not ignore.

Construction of the reality is the only way we could ask for the world. That is all proof we need our actions.

The containment of China through economic blockade must be understood as a new reality for the future. This is precisely the same as the situation in Japan before the war. We must never make the same choice as Japan. These should be done in reality as well as in the correct theory.

All these give us an idea that the unification of Asia could be all the bases we may ask for the

future.
