

The new reality under all contact with the universe and facing the world under any decisions

KURODA International Consulting

Takeshi Kuroda

Contact may serve new space technologies as we must prepare to build all infrastructures to use all new possibilities. To face the world as we need capital and to make all further plans for the future.

All contact with Universe may be required with a new contract. It comes with both benefits that we have to know.

Foreign affairs may be changed under all new realities. We are preparing a new environment based on the self with coming realities.

All changes may not be away from themselves. We need all new bases to handle all coming changes.

How could we offer any contract with Universe? And what do they seek for themselves?

As we have to build own system. We have money and an economic system as free trade zones.

The division of the military world inevitably demands self-superiority in reality.

Equivalence and superiority in military power, economic power, capital power, and space technology are necessary.

And we may appear our world vision against Anglo-Saxon Mission. That may cause a new reality in the world that we could expect from ourselves.

And we need all human sources to realize all new visions. We have all these challenges to ask for our world then.

You may say it is impossible, but we shall determine and take all actions under the right plan. We see that we could expect new reality in our realities.
