We have a choice in the future. We find resistance in Israel by Hamas. We see the Agenda for a new world that Rockefeller presented to the United Nations.

The world has started as a great reset.

And there is a word called armageddon. We are facing the end of history.

A new foreign affairs may ask for a new reality. And we find any permissions to make all our realities.

If all world nations ask for a vote, how could we make unification and unified government?

Building consensus in bilateral diplomatic negotiations can make a new reality possible, and they can use diplomatic lines with all the world's countries to propose the construction of a new reality.

Then we have to see all our necessities. That causes us to make our world vision. That is a consensus we could work together.

Then, we have contact with the universe. They have their purpose since the new world order is related to the universe.

New world consensus could cover the whole world using new technologies. And we have a new era that puts us into new possibilities in the universe.

We can not be away from wars, so we have to prepare them to face new realities in the future.

Under these realities, war can be a means of owning the world.
