Takeshi Kuroda

This new world asks for a duty for all people to be served standard life. Politics must ask for all these agreements and ask for recreation of any realities.

Asking without any rejection and discrimination, and we have an ideal of a world without pain and suffering.

And the world without wars could expand its agreement to unify the world. We have a hope that continues any history.

What is all we need to know? That must be a choice and decision since they give us reality and the future.

On the other hand, all politics realize them all. That is all the reason we have to rely on all political leaders.

Hope is the only thing that gives a past. That is true. And we need hope for the future.

Hate may not ask for a solution, as we have seen all the tragedies in Ukraine and Gaza. True political leaders could give us the future.

To put our eyes to reality, there are so many socially vulnerable. They also have to ask for their lives.

These all are the duty of politics. If they have the determination, everything can come true, even in the hope of the future.

But for one truth, Children in Gaza strip, he has a tear. And the politics could solve them under his decision.
