Takeshi Kuroda

All children are waiting for Christmas, even in the Gaza Strip. These are typical examples of the world's unification.

We are asking for all the responsibility of politics. These are any offers from the office to the world.

These are the dreams of all the children who died in the Gaza Strip. So we may find all the duties of our beings, which is also the world's duty.

You can remember what we said to the world. Real politicians stand against any difficulty and create a new world that contains all the above-mentioned dreams.

So he is the gift to us all. Only then may we find the future with hope.

We need a gift from Santa Claus if we have a Crist mass.

Politics always make a world, so we need new heroes.

In any world reality, this is the only way we may gain the future. The baton of hope cannot be closed.

The world is for everyone; this is a gift from Santa Claus, and politics must follow this agreement.

If we have a choice, what should it be? The courage is that in any condition, we can find the future as all political heroes lost their lives.

These are the attitudes of a real politician. He doesn't have any hesitation or fear. And he talks truth to the world with hope.
