The third world

KURODA International  
Takeshi Kuroda

The world has two choices. Goodness and evils that what is. But we seek third choices.

As we mentioned, all letters are as so as it is. Above two must ask all struggling, but we are away from it and do our world.

These effects must cover all world. They must ask for war, but we offer the peace that all differences must gather everything with a globe.

Above two must reject all reality but themselves that gives opportunity we may own the proper.

This wise decision is defined as the third world.

That means we may have all possibilities to realize all our proposals.

You may imagine that if the world is forced to face decisions, how we may have all reality?

We are trying to be brave as standing with its independence but belongs. That is all our determination. We are trying to own the world.

All these challenges are conquered within a week. That is what we are asking to realize all our proposals from KURODA International.
