

The truth and world

October 14<sup>th</sup>, 2024

Kuroda International Consulting LLC

Takeshi Kuroda

What if we could know the whole truth of reality, which has its behind any reality we see on TV and in common? We are trying to invite you to the real world.

And as we see Holly Wood's movie, we find Matrix. That is a reality we have in the world today. All media control contains any reality we have with the world.

If we find all the truth of the world, what should be the difference we see in the world?

We must find a hierarchy of the world that only permits us to participate within a world. And we may know that these are the people who make all efforts to seek their future.

We, Kuroda International Consulting, offer you a new world, as you can find with our concept of Creating the future.

These are the reality of the world, a power game we can't avoid.

We have a new participator, a comer from above in the universe.

We all conflict with the world today, and we may see that these are the correct explanations for any reality of the world.

We need to know what should be given to us all. That is the choice to seek the future, and that is the only permission we have to seek the future.

We may find in all new technology with any progress of reality today. And we need to know who has contact with the universe, as we can discover Roswell 13 and Majestic 12.

We tried to redesign the world, but today, we are facing a new reality: a shift to the new world. They have their government as they seek to improve their world. But we need to strive for our world instead of their world.
