

The wave, which is called globalization

March 24<sup>th</sup>, 2024

Kuroda International Consulting

Takeshi Kuroda

The world asks for its unification under the same measure called globalization. All these are the exact steps that are shared with the whole world.

All these means we are sharing the same rules and the same realities. And we can find its unification of the world.

We must know that we have the same standards as the world, which is globalization. All these are common in international society.

These realities allow us to find ideas for the future. We have a common language and reality.

As we can see, the world is seeking its future.

Above all truth, the world may ask for any decision of itself. We can see all these are efforts of the United States of America.

If all these realities are given a decision, how may the world be changed?

We have evolutionary changes today in any field of the world. New technology is promised new futures under a free economic system.

I give you the truth: all tyrant must seek their dreams in all these realities.

And above in the universe, there are all their effect on this planet; they are seeking for all their purpose.

We will face new decisions in the future, but we do not need to be afraid of all changes today. Politics may dream of the future under their decision to create a new world.

If we are permitted all our dreams, what should be the decision?
