

The wealth with its decision

February 28th, 2024

KURODA International Consulting

Takeshi Kuroda

Under all, its survival game is called reality with all the truth of history that contains any wars. But under all its consensus, wealth takes over all its reality today. This is called capitalism.

Historically, wealth is a power that any empire has in its prosperity.

It must be ironic that we have the same reality as history today. Today, we have the reality of international financial capital.

Throughout history, world hegemony has always existed with the concentration of wealth.

All empires had gathered any wealth for their prosperity. Even today, we find all the same truth in the world. And it still has power games.

We are at the pinnacle of history. And the presence of all technology tries to occupy the world.

Power is always a decision of any reality. So, the USA appeared in the 20th Century, which was a revolution. They had their justice.

And the economy we have today that makes all reality under its productivity. But we find its tails by Capitals as I insist International Financial Group.

From Spain to England and from England to the USA. This is the movement of huge capitals that asks for the world.

Capitals have the potential to create the future under the law called capitalism.

Wealth has all the possibility to possess the world and any realities. We find all the tails of the world. That is a proper understanding of any politics.
