

The western justice called competition

March 29th, 2024

Kuroda International Consulting

Takeshi Kuroda

Loser may not be permitted to create the future. This is another reason communism lost this world game.

Competition and victory are all justice of the roots of the West. This is a proper understanding of The USA.

But all these cause the hierarchy and any gap in reality as we find all social problems and poverty.

As we stand on the roots of the East, we could propose a new socialism that bases all livelihoods on all duties of politics. As we see, we are seeking new world systems.

At this moment, you have begun to consider my words seriously. These are the possibilities for finding a new world and the future.

You find that true man's show is real. He must not give you a lie.

International financial groups govern the world. And these are the results of competitions.

We find all social problems under all the rules and laws of the world.

We propose a new form of socialism: the East should stand against the world.

Fairness, called equality, may base a new world that permits seeking equality in the future.

Under any solution to all reality we have with a world that is all new bases, we can step into the future.

We have proposed a new world under all our ideas. It is all our honor to be in touch with the world.
