

The world after Henry Kissinger

November 30th, 2023

Kuroda International Consulting

Takeshi Kuroda

I want to express my sincere condolences on the passing of Henry Kissinger.

We have to know the world lost its king. Waiting for 14,400 chosen people will inherit the world.

These are the beginning of the new world. And the world follows any plans by all those people.

Who could stop all these works? At least we could propose other world designs. That is any proposal from us to the world.

14,400 selected and 6 million elites are the new reality waiting by the new world. We need equal standing points against them.

The reality with reality must be all our decisions for our future. We may not dream of the future, but I said that.

But we need our decision to the world. We can't follow other decisions.

Any decision from the universe may change all reality on Earth. We could seek any opportunity in the world.

All these may not be any conflict, but they are trying to share the same visions.

My idea is capital with capital, military with military, and the future with the future. We need to stand with the Western Camp.

Hope is only our steps asking for our future. That must be the right consensus in politics.

If we ask for our independence, I may not be wrong. But the other decision may reject me from the world.
