

The world agreement

April 11<sup>th</sup>, 2024

Kuroda International Consulting

Takeshi Kuroda

The world does not ask itself to be under any presence or occupation. We propose the world agreement, a monumental step towards global unity and progress.

There are many arguments at the world conference. We are willing to make all the decisions of the world.

These are new ways of sharing any opportunity or the future instead of any occupation in the world.

We are now putting our new steps into the universe. There are new alliances and cooperation with them.

This shows us the new reality of participation and a new world with all cooperation with the universe.

We are not trying to put ourselves under to be forced but are willing to unify all opinions and realities.

These are the laws of the sun and north wind.

We raise our right and hope to agree the all decision of the world under the world conference.

Unification must be the agree and abolition of the wars. We do not need any tears as we find them in Ukraine and Gaza Strip.

Agreement is totally different from directions. We could ask for our own volunteers.

This may be the new laws of the new world. Then, we may declare all new steps into the universe. We can make new friends.
