

The world and The USA

Kuroda International Consulting

Takeshi Kuroda

The USA has the highest presence in all reality. Facing hegemony is an aim and obedience to all truth.

Technology and society may be an all measure to the future. Under all politics, they may have only decisions and handling to any reality under all its truth.

How do we wonder about the future under all bases? We must be wise to catch all realities. Sima Qian was a genius, an eternal truth that what one learns from history gains the world.

We must find all the same patterns in reality from history. All progress in academics and technology could make a further presence, and we equally have a future.

There is all calculation to all truth and information to settle self in reality. That is the only wise decision.

A trend gathers all dreams from the world. That may seek their future. In unilateralism, America's hegemony over a new world is capable of creating a new world at its absolute cutting edge.

In history, there are all wars, and it has a victory with its ownership. This was the only truth of any reality. We may not find a saint in any history.

But we all know that it caused all tragedy. So progress of sociology and ethics seek a new world as a paradise.

A dream and reality are always different. I will give you the truth. That who is stolen by hatred is Satan, and those who hold love must be a hero.
