Takeshi Kuroda

Recreation of all reality permits us to dream of the future. We see all conflict and new wars in our reality with a world, but to change the world. Then, we find a new future.

New cooperation can resolve all conflicts. It is about embracing a shared vision, future, and world.

These are proposals that can resolve reality's apparent contradictions and create a new world that is agreed upon by all nations.

Power games and Authoritarianism seek to determine the world's position. So, the only thing we may have in mind is the lyrics from Imagine by John Lennon.

To be wise, we must know that choice is a reality we cause with the world and the future. We can't follow habits and customs but are willing to make the future.

These are the determinations we make about the world itself. We need our design of the world to be fully argued by any talent using any academics.

Will is different from any reality; it is a creation of itself. These may not be any curiosity, but they can reach the future.

We need complete agreement from all representatives of all nations to share a new world and a new future.

It would be best if you did not doubt our ideas but tried to share them with the world. Then, you may find any difference in reality, which is a first step to a new future.

From any disappointment to new hopes, we may leave from the past but all futures. We, Kuroda International Consulting LLC, insist on new futures.
