The world has a history, and it seeks the future. What do we see in the world today? What is a decision for the future?

We have all learned in history, and drama makes us cautious about the world and the future.

Wars must occupy any history on earth. So, we have had many tragedies in history. So we have all new dreams in the world today.

But for truth, we can't be away from history, but we can't be jailed into history.

We have all the new creativity of the world today. These are the latest technology in a new world.

There are so many heroes in history. But if Holly Wood is right, they are the fakes, but Captain America is.

The world's decision may not be the history, but it must be the future.

How could we accept history? That is the proper basis that permits us to seek the future.

We need the right decision for history. There is a reason that history may not steal the future.

We have a choice to the history that permits us with the future.

There are right decisions for us to find and reach the future. These are the righteousness of our beings to make the righteous world.

Truth is the reality and decision at any time in the world. Politics may find everything is a reality as we learn all history. These are the wisdom we may seek for the future.
