

The world and its necessity

KURODA International

Takeshi Kuroda

The future is a priority we must guarantee. The show must go on.

The world's tail is with technology and capital, army, ICBM. This is a reality we are facing by Ukraine matters.

There is a plan starting from Ukraine to unification by a world government. Next with middle east and china. That what we can see is the construction of Justice covering all reality. These justice are from the CIA.

Only we could handle the world are we need same army forces. Equal condition and reality are only its permission we may stand the same position to the world.

With all curiosity is, all nations are promised to lose themselves. That must be a way they have owned the world.

Then 14,400 selected, and 600 million of the elite took over and created the world. This is called the new world order.

With a Russian matter, some tails are using the atomic bomb. Mr. Putin and Mr. Zelenskyy both have a choice in their use. NATO may not determine himself under Russian nuclear bombs.

For the truth, all nation representatives may not be a king that must be less than a servant.

Their king is indeed called Satan. His dream is undoubted with the world.
