

The world conference

Kuroda International Consulting

Takeshi Kuroda

Gathering any representatives of the world, we are trying with the decision of the world by the world conference.

We are trying to take a majority of the conference and possess all world decisions. The western camp may join our choices.

All these new circumstances may give a decision of the world. The world is governed by a democracy so that the majority decides in the world.

And all these could expand to the new governance of the world with its unification.

We are having environmental problems, conflicts, and disputes. But under gathering conferences, we are trying to solve all issues and make all decisions for the world and the future.

And we see we have a new era of all participation in the universe. All declare to the universe, and all nations should share decisions.

And we are in touch with a new world and a new future. What could we find in them?

Out of any occupation of the world, we could share all futures.

We have a new future today. All new technology and opportunity to a door of the universe may serve us a new future. And who has a decision of the world that we have to ask?

We are trying to offer a new future to all peoples of the earth. A new future may give us new dreams.

And what is a decision? As we offer new decisions of the world from our office to the world.
