

The world conference

Kuroda International Consulting

Takeshi Kuroda

Gathering representatives from all nations, we are asking for a world conference. This forces them to decide the world.

We have in common that there is all reality in the world called the new world order. But all kings ask for any decision for the world.

One thing is that we are not trying to be against Illunimati but trying to ask for a different vision for the world.

A deal could ask for a different world if any agreement is given under all this conference.

For all these circumstances, we send all proposals from our office. There must be an idea that we can work for the world.

As we know, the world is divided into two differences. We can see it is a difference between goodness and evil.

Who has a right to seek a future? We may ask all these questions to the world.

Everyone must ask for the world's true if this comes with an open conference.

In truth, there is a decision that we prefer with all this conference to ask for the future.

All representatives are kings. That is the reason we are asking for a decision of the world.
