

The world consideration

KURODA International Consulting

Takeshi Kuroda

We have all history containing wars and sorrow, even death and life. At this point in a moment, we may consider the world.

There is a war in Ukraine today. This is from American unilateralism. Russia has itself with a tail by a number of nuclear weapons. We must know that if the world agrees to solve the war in Ukraine, the fight must be stopped.

On the other hand, there was an emperor called China. They are standing against liberalism. They have their justice. The liberal camp calls China the last enemy.

The United Nations and the Permanent Security Council cannot provide a solution. It can be assumed that these are Rockefeller castles. But Russia and China spend themselves in the Permanent Security Council. If they try to disclose all information, the world could make a different decision.

All intelligence agencies hold the truth of the world. That is the truth of politics that is separate from the masses.

There is all contact with the universe. That is a new world, but we are not permitted to know.

All these are considerable truths, and we may see that the world is under control.

President from the USA if he does not even have a choice. What can we see in the world?

Revolution is a truth that people are trying to hand the world into their hands.
