

The world decision

November 22nd, 2024

Kuroda International Consulting LLC

Takeshi Kuroda

The US tariffs give the world a new reality. The Trump-Putin alliance runs counter to that reality.

But the world needs its future; this is all the reason we need our actions.

We, Kuroda International Consulting LLC, have proposed a new world vision and any frameworks, if it may be an idea for you to make any reality of yours.

The world may ask his decision. That is a future and new world. We have tried to be in touch with all reality we have with the world and try to seek a new future.

But any reality can't wait for the future; they seek themselves in their reality and the future.

Unless we do not make our actions, the world is only following their world.

We may have all arguments and discussions with the world, that is, any consensus in International Society to seek all new changes and the reality.

We may not be away from all reality of the world but dare to occur new world itself.

Then, we have an idea that we must cover all our realities as much as possible. These are any bases of Asian alliance.

Any diplomacy, military, or economy must seek an equal presence in the world. These are the only ways we may survive and thrive in the future.

And power may be bowed under its progress of any discussions which gives us the future. These are the justice of the world which we can make our challenge.

If the politics is king, they must possess the world and decide the world.
