

The world power balance

March 9th, 2026

KURODA International Consulting LLC

Takeshi Kuroda

American unilateralism, Ukraine invasion and Iran war makes all changes to current world power balance. And the economy is seeking a new future under their creations.

New military power and strategy are given under all progress of intelligence. And we are facing a new reality today. Even the industry is given under all its progress of intelligence.

We can see that the progress of humanity is led by the USA. They may have all their world visions. And the Western camp must support them in the future.

But equal standing is the only requirement in reality if we seek our independence. All these are a righteous consensus of any politics.

And new diplomacy may be the key to how we may find our futures. These are caused by national strategy and decisions.

We can see all the propaganda of Langley admires all the realities of the liberal camp and their justice. But if we disagree with it, we need to have our world visions.

And we are now in the age of Aquarius, which means we have a new era to ask for any relationship to the universe.

All these are the truth and reality, so we can be away from it. Then we are forced to make our decisions.

Hope is the only choice and any direction we may find in the future, and if we have the right consideration of history, this is how we carry over any history from all past to the future.

*KURODA International*

So it may be the right decision for all politics, and we may have our new dialogues for the future.
