

The world revolution

KURODA International Consulting

Takeshi Kuroda

The age of kings goes to the age of people. These are the revolution that we have to know.

Wars control the past, but today all people are celebrating freedom. People yell about the ideals that are a new reality as a revolution we have.

It is true that people have put self-repression in the past, and the birth of America today has that revolutionary reality in the future.

The revolution will be successful when all the oppressed hold their ideals for the future. This is what the kings of the past will be judged on.

We may wonder if all these are populism. But people have their truth.

Any acceptance without limitation permits a choice of the people. All these are the health of any realities that we insist on.

They might even stand against the liberal camp. That is all reason these are the revolution.

Any freedom of reality attracts people to its existence. Expanding all reality must cover the world. We now have a new trend in life.

Responsibility only permits reality. That is remarks we need moral.

This is a consideration of the new world framework. We propose a new world from our office.

All these turning points in all history are true. We could propose a new world as we have to spend ourselves in the future.
