

The world strategy

KURODA International Consulting

Takeshi Kuroda

The world strategy is a way to reach hope and reality. That is what we need to be in any reality with a change in the future.

The world is under one decision. We have all the requirements to know it with us all. We have to make the same consensus, and we may not seek for even a conflict.

The world strategy is any basis to make all our future. That is a vision we could ask for all cooperation with any nation, even with the universe.

There, we see many ways the world asks for a reality. But one world is the only permission that is allowed under any reality.

That is more than any proper understanding of the world. That is a reality we have to face and handle ourselves.

In history, starting from World War 1st, any effort has failed. But we need to know who has a world today.

That learning tells us to be more than wise to face the world.

The liberal camp has a consensus in a tail. That is the truth of them and any reality of theirs.

There is a decision under the power. That is called a power game and reality itself. That gives us an idea that we must prepare for all our reality against them.

Consequence may be a consensus, but on the other hand, we need a reality in any field of our realities.

Power could be a decision of the world. Under all these circumstances we need ourselves into any reality of the world. And that gives us the right decision for the future.
