The world unification

KURODA International
Takeshi Kuroda

The world is divided with any history that is struggling with wars. We have a challenge that is all unification.

This is under a complete agreement of any nation by its representatives. At this time, the world is erasing all countries but its government.

We are asking abandon of the wars and own volunteers to participate in the new world.

This comes with agreement by its unification. At this moment, we know these are all tails of reality but with its priority to join the world by agreement.

Amnesty for all crimes and agreement of the new world. Coming new future gives full participation to the universe as full cooperation by.

This may not be a dream but a reality we are facing today. That causes us a choice for the future.

Participation in the unification of the world in the abandonment of national rights, along with the agreement to abolish the war, proposes the creation of a new world.

We are gathering under the same ideal and future that I propose.
