

The world war 3<sup>rd</sup>

Kuroda International Consulting

Takeshi Kuroda

China against the USA goes world war 3<sup>rd</sup>. But we see it as Russia with Ukraine, with secret agreements on its tails.

It makes a full of the collapse of any realities in the world. And who is trying to give a new rule and system?

As we face any realities, what is our decision under any permissions? The world must be divided into two differences as we enter the future. As we can guess, it must be Armageddon.

What is the best decision for us? We need a future that forces us to make the right decisions.

How does China seek a war? There must be an invasion of Taiwan. And in the far east, we find bases of the US Army.

How could we find an economic meltdown? And United Nations must build its justice and cover the world with new rules.

We see all new technologies in the military, and who prefers using new weapons?

There must be a plan, and who needs to be fixed with them?

There is a reality with the Western Camp. So, on the other hand, we could make them from the decision of the whole of Asia.

Looking around any reality of the world, any decision could be covered in any reality. But the other vision could gather the world, as we insist new world then.

Two different visions could be seen in the world—ideal and hell of reality. We have our decisions. And the world has its choices.
