

The world with a change

KURODA International Consulting

Takeshi Kuroda

How could we find a future? We have to know all details of the plan. That is what the world follows.

But if we take action, we could see any changes.

We have all world leaders, but who could give us the future?

If all people are dumped in mass as if we face all new elites. What could we have in our minds?

There is a new world that is all planned. We are facing all its decision.

Who occupies all new technology and huge capitals? That is a who possesses the world.

There are all tails of any realities that we have to know. Only with a truth we could ask for a life and a future.

How could we find a way to the future? Courage only expands the way and the reality that we can rely on ourselves.

There is also any contact with space. What can we find with them?

We have no answers to know, but with any steps, we have answers.

We may have our vision of a world. That is what we could rely on ourselves.

A brave only is permitted the future, and he may give us a direction and the way to the future.
