

The world with a new consensus

April 9<sup>th</sup>, 2024

Kuroda International Consulting

Takeshi Kuroda

If all representatives and nations agree on any consensus, we can find them worldwide. All these are the arguments we could offer to the world.

So we can offer and propose a world conference to decide the world. All these are similar to the United Nations, but the world is under its agreement and consensus for the first time.

All that's curious is that we are not trying to avoid Siria and North Korea. They have to have their vote.

Any votes of the majority must be decided. So, we do not find any presence at Western Camp.

We offered any of the new world visions from our office. And we are asking all votes of the world.

Ideas may create the world. All new frontiers may dream of the future.

We are trying to achieve all our hopes and determine ourselves in all our proposals to the world.

This is the decision we all discuss and make, and we all make decisions about the world's future. We now have time to step into the new future.

You know we are facing all new possibilities as new technology is given and new relationships with the universe.

This shows us all the necessity of creating a new consensus.

We may create a new world without any friction, but these are the consensus and agreements we are trying to offer.
